Laboratory Animals Safety Precautions:

General:

Animal house located in a separate building. The laboratory animals are housed in cages placed in an air conditioned room where a constant 24* c temperature is maintained with 45% humidity.

- The doors and windows are predator free and floor is tiled.
- The cages are cleaned daily to provide a hygienic atmosphere

Fire: A fire extinguisher placed to avoid fire mishaps.

Dead animal's disposal:

Dead animals are disposed to the bio medical incinerator of the medical college after doing post mortem by the vet.

Record is maintained at the animal house.
