Aim and Objectives:

- To detect and document drug reaction among outpatient and hospitalized patients.
- To identify quickly so as to avoid important or serious reaction.
- To find out the pattern of drug reaction for commonly prescribing drugs.
- To analyze the data for teaching & training purpose.
- To undertake research works related to Adverse Drug Reaction (ADR).
- To sensitize the Practitioners and other health care personnel including nurses
- To inform concerned authorities.
- To share the information locally and globally.

P.T.O.

Frequency of Meeting 2nd Thursday of every month

As the Pharmacovigilance centre has started functioning in our institution, I request all doctors and nurses involved in patient care to check carefully for adverse drug reactions. Whenever drug reaction has been observed among in the in-patient and/or outpatient, kindly inform to Pharmacovigilance Centre and also fill up the volunteer reporting form. I further request all the head of the departments to nominate one of their faculty members to check and monitor the ADR and report it to the Secretary Dr.K.Kanagasanthosh, Notifier Dr.T.Nivethitha and to the department of Pharmacology. Subsequently details will be filled in the reporting form. Finally the details of the ADR are assessed by Secretary Dr.K.Kanagasanthosh & Co-ordinator Dr.K.Vasanthira, and the report will be send through the Dean to the National Coordinating Pharmacovigilance Centre, Ghaziabad.

I request that each and every one of you to participate in this endeavor and make the Pharmacovigilance programme as a continuous process.

This Pharmacovigilance centre will also be known as the peripheral Pharmacovigilance centre for the purpose of administration and correspondence.
