

## McADROIT'18 - NATIONAL LEVEL TECHNICAL SYMPOSIUM

@

### Easwari Engineering College, Ramapuram

MCADROIT 2k18 was conducted on the 24<sup>th</sup> of January 2018. The program started on an auspicious note by lighting the kuthuvilaku and the invocation of tamilthaivaazhthu. Our beloved HOD welcomed the Gathering with his words followed by the President of SME who gave a gist on MCADROIT'18. Mr.K.M.Natarajan was the chief guest of the function. It was a great pleasure to have him among us. He enlightened the gathering with his vast knowledge. He spoke about the advantages of being a Mechanical Engineer and about the various fields a mechanical engineer can get into. He himself set an example for that. He then spoke about the arising industry 4.0 and that it will be the future of the world. He also emphasized that though it's going to be all about machines in the future, man power is very much essential and that the upcoming engineers are not getting wasted. He said, an engineer must be strong in any one of the "core competencies" to survive in this competitive world. It is going to be all about practical knowledge in depth to the subject rather than getting marks by 11<sup>th</sup> hour preparation, he said. It was more of an interactive session rather than a passive session. He was also kind enough to invite us on an industrial visit to his industry to enlighten us even more on mechanics. His words really helped us think and will surely guide us in the right path. Our respected principal then addressed the gathering. He elaborated about the industry 4.0 satirically comparing it with 2.0. He then spoke about his liking towards the subject in mechanical engineering and its advantages. His words will play a vital role in our pathway to success.

The official proceedings ended with the national anthem and the showcase of MCADROIT PROMO

Successfully this year marked the maximum number of registrations in both technical and non-technical events.

### **TECHNICAL EVENTS:**

A lot of technical events such as paper presentation, blueprint, machine it etc. were conducted. Various students from various colleges participated in the events and showcased their talents. The events were judged by the faculties of mechanical department wisely. It was really a very tough task deciding the winners as there was a heavy competition. Our faculties tirelessly helped us in making the events a great success and supported us a lot.

### **NON-TECHNICAL EVENTS:**

To add more colors to the special occasion, there were a lot of fun filled events such as box cricket, futsal, fifa, connexion, etc. Many students actively participated in those events and made our MCADROIT equal to a small festival. The office bearers did a good job in conducting the events and decided the winners impartially.

In the auto expo there were a number of special luxurious cars and a number of modified cars. Also we had a number of special bikes. Students were awestruck by the throttling noises and were glad to have them on sight.

Our Second year student and his team showcased their talents in age old art “silambam”. It was one of the highlights of the function and was much appreciated and enjoyed by all.

The day ended with distribution of prizes and will always be marked as a special day in the calendar of 2k18.

### **About Easwari Engineering College, Ramapuram:**

Easwari Engineering College was instituted in the academic year 1996 -1997, with the Approval of Government of Tamil Nadu and AICTE, New Delhi. As per Govt., Regulations for affiliation, originally the college was affiliated to the University of Madras, subsequently the college is affiliated to Anna University Chennai since 2002. Pursuing the philosophy of continuous learning, the Institution prepares the students to score creditably in the Academic sessions and also encourages them to develop their interpersonal and intrapersonal skills and attitudes to approach life with confidence.
