### Two Days Workshop on “Antenna Design and Microwave Circuits”

The student association of ECE (SECE) organized two days workshop titled “Antenna Design and Microwave Circuits” on 12.03.2018 and 13.03.2018.

The inaugural function of the workshop was held on March 12<sup>th</sup> 2018, around 9:00 am at Seminar Hall, VI floor – EB block. Mr. T. Jayanandan, Founder – Tesla Minds addressed the gathering with his innovative ideas and motivated the students towards the opportunities in the field of antennas. He briefed on the technologies and the simulation tools involved in antenna design. The session was inspiring and more informative for basic learners.

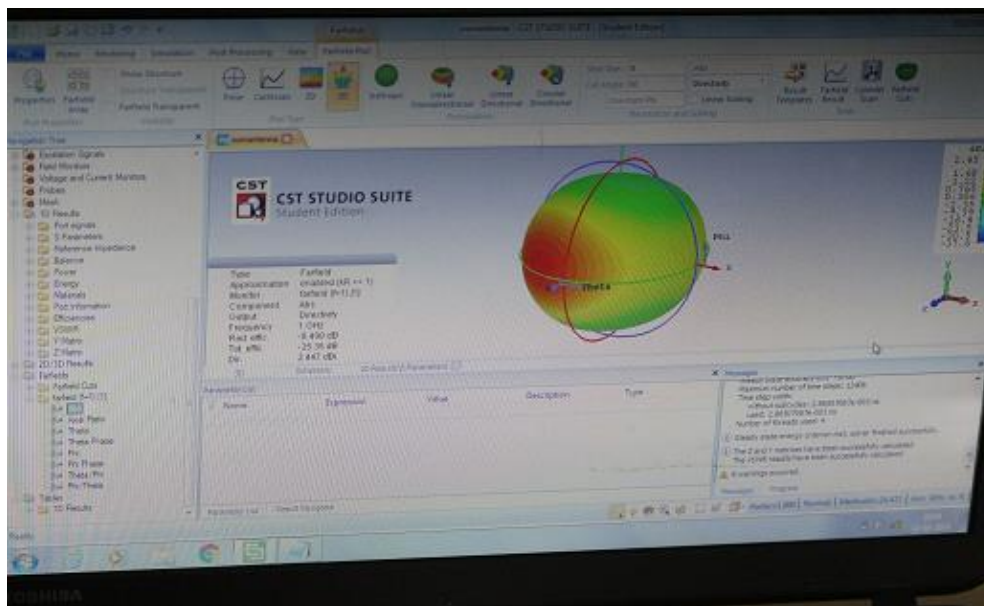

Dr. K. Rahimunnisa, Professor and Head / ECE, felicitated the gathering, with her encouraging words and motivated the students to take up projects in antennas.

The response for the workshop was overwhelming and the registration was restricted to 30 on first come first serve basis. Hands on sessions were provided by the technical team from Tesla Minds.

The participants put forth their maximum effort in designing antennas within the time bound of two days.

The workshop was concluded by appreciating the interests of the participants towards learning the antenna simulation tool. Certificates were issued to all the participants. The coordinator thanked the participants and all the SECE office bearers who helped in organizing the event.
