CHEMICAL SCIENCE

PROCESS OF MAKING A FACE CREAM

AIM:

To make an ideal face cream

COMPONENTS USED:

- * Melon pulp - 2 tablespoons
- * Lemon juice - 1 tea spoon
- * Gram flour - 1 table spoon

ADVANTAGES OF LIME AND

MELON FACE CREAM:

Melon contains vitamin A and E which nourishes our skin. It also prevents premature aging and hydrates

the skin. Vitamin B and folic acid are also present in melon which increase collagen production and keeps our skin healthy. Lemon juice has skin lightening properties and is a source of Vitamin C

PROCEDURE:

- * Take a Bowl and add all the ingredients.
- * Mix it well and bring it to a semi-thick consistency.
- * Once it is done, apply it on your

face.

* Leave it for about 10 minutes and wash it off with cold water.

VARIATIONS:

Instead of melon pulp we can use dry powdered melon seeds. Lemon juice can be replaced with milk or rose water.

RESULT:

A healthier and glowing skin can be seen after using the homemade face cream using natural products
