

## Process of making Comfort fabric conditioner

### Component used to make :

Water, corn starch, vinegar, Tenopal glycerin, Lavend essence, surfacel essence, Lily fresh food colour.

### Process of making the comfort fabric conditioner :

Pour 300ml of water in bowl and add three table spoon of corn starch stir well and heat.

Stir well till forms gel like substance without forming lumps.

Add 75 ml of Vinegar to the gel after it cools. Filter the gel add vinegar to it.

Vinegar kills the bacteria and avoid the bad smells in the clothe.

Add one spoon of Tinopal and three spoon of glycerin to the liquid.

Add one spoon of Lavend essence and two table spoon of surfenel essence to give soapy appearance.

Finally add the lily fresh food colour few drops to the prepared liquid.

Now lily fresh comfort is ready pour in bottle and use.

### Variation :

Only three type of variation that is Moening fresh, lily fresh and 99%. Antibacterial action is now available.

I wish many variation like lavender, shawberry and many types to be produced.

### Ideas :

Fragrance pearl settle in fiber of cloth and release fragoance the day feeling fresh so many variation shall be produced using fruit flavours.

Marketing using the advertisement with small kids reach the people more.
