We are Confident That Success and Achievements of The Institution Should Synergize In an Environment of Mutual Acceptance, Support, Goodwill And Teamwork

'Education is the weapon which is used to change the entire world'. There is no better way to pay back to the society than providing the most desired and significant platform to modern education.

We, at SRM, tend to build a proficient individual out of a naive human not just by imparting bookish knowledge, but by rendering them humanitarian values like wisdom, compassion, courage, humility, integrity and reliability which will lead to a broader perspective of life. We have a deep understanding on the needs of the young minds and cater to nurture them to shape their lives. The campus, academics and extracurricular facilities all bear testimony to this effort and add a remarkable education experience in student's life.

In order to promote an internationally comparable education, our key focus has been on faculty development – by providing continuous training to the teachers to enhance and upgrade their skills in order to deliver real value education and excellence in academics. Students always look up to their teachers as role models and inspire confidence and trust. Further, the School inculcates in the students, the value for holding up to their cultural traditions, self-discipline, and good ethical values for a good life.

Learning must be continuous, relevant and adaptive. The Core outcome of the school education is to prepare students for the future life. Digital technology which is one of the key competencies of the 21st century is already been initiated in our school. Other life skills such as Interpersonal, Problem solving, Creative and Critical thinking, Social and Emotional skills, Intercultural competencies are given through various programmes and competitions held round the year. Teachers who serve as the pillars of the school are given periodic training programmes to equip themselves and to know the development in the field of education. Parents are also given orientation programmes. Students and teachers work together for the betterment of the society's future.

I thank one and all for extending your valuable support and cooperation which would definitely pave way for us to reach greater heights.

MESSAGE FROM PRINCIPAL

Learning and teaching should not stand on opposite banks and just watch the river flow by; instead, they should embark together on a journey with the flow of water.

Through an active and reciprocal exchange teaching can strengthen learning.

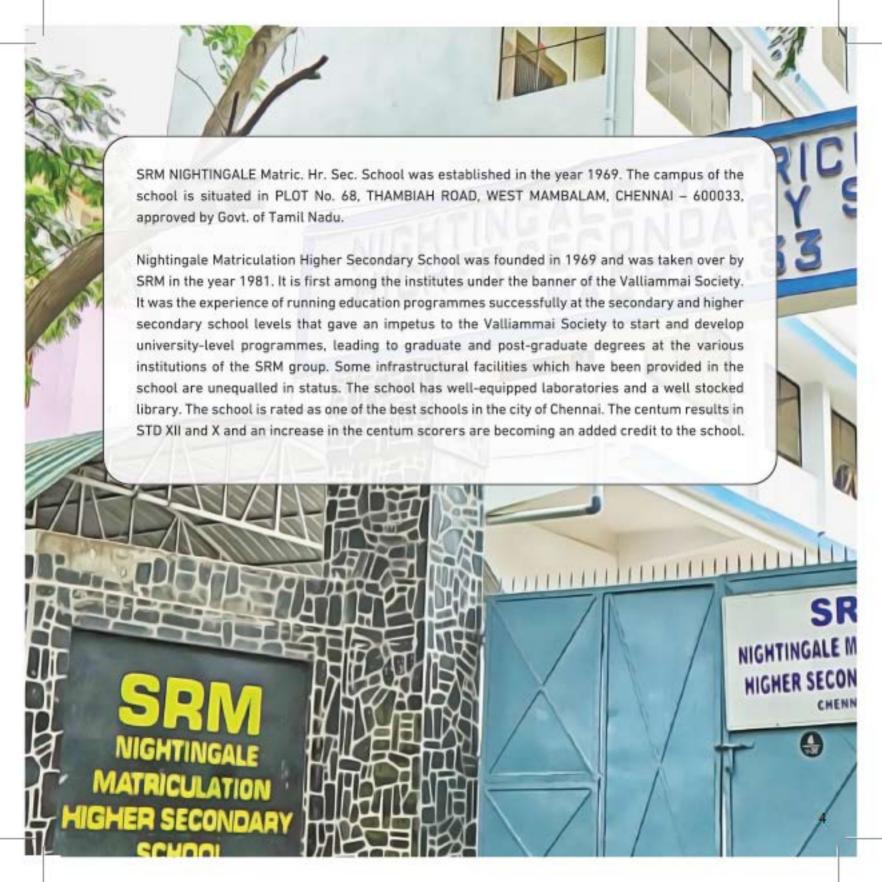

To those who see with loving eyes, life is beautiful
To those who speak with tender voices, life is peaceful
To those who help with gentle hands, life is full And
to those who care with compassionate hearts, life is good beyond all measure!

Mr. T. Amalraj, M.Com., M.Ed., Principal

By taking into analysis of the biological, Psychological, Financial and Social dimensions, the Parents' role are of the maximum importance for personality development of children. Parents should spend time talking to the children, share happiness and teach them that life is a combination of happiness and sorrow, good and bad, stress and ease. Parents should build confidence in the students to face the world. Make them appreciate the thorn in the flowers. The role of a parent is equally important in the development of a student.

The main aim of education is to mould the student as a responsible citizen, who cares for the society. A good student is one who possesses a positive attitude in his approach, the ability to achieve his/her goal, self-discipline, and perceptiveness.
